[Representative \_\_\_\_]:

Thank you so much for your leadership in saving the Child Fatality Task Force! Your initiative does not go unnoticed.

I serve in an advisory role for \_\_\_\_\_ County's Nurse-Family Partnership (NFP) program, an evidence based community health program transforming the lives of vulnerable first-time moms and their babies. The care and support they receive from registered nurses during home visits results in healthy pregnancies, responsible and competent care for their children, and economic self-sufficiency.

Nationally, NFP has proven to reduce child abuse and neglect by 48%, reduce preterm delivery for women who smoke by 79%, and reduces childhood injury hospitalizations by 79%. JAMA Pediatrics – a well respected peer review journal – found that nurse-visited low-income mothers have a significantly reduced rate of mortality for themselves and for their children throughout the 20-year study.

I sincerely appreciate your leadership and dedication to preventing death and injury among young people. I look forward to sharing more about NFP when session wraps up.

Sincerely,

[Your Name]
