

Circle of Parents

North Carolina Statewide Summary

2020 Snapshot

Overview

The coronavirus pandemic abruptly canceled program delivery and administration of the The Protective Factors Survey (PFS). The PFS was administered during the period of February through early March 2020, using a post-test/retrospective pre-test format, providing 289 data sets for analysis.

Findings

Analyses of protective factors suggest an overall positive impact of Circle of Parents, increasing the health and well-being of children and families. Protective factors that have statistically significant results are followed by **(SS)**, meaning analysis resulted in a p-value of 0.0500 or less indicating mathematical confidence that the result is reliable and unlikely to have been produced by chance.

Protective Factors

- Family Functioning/Resiliency **(SS)**
- Social Emotional Support **(SS)**
- Concrete Support **(SS)**
- Nurturing and Attachment **(SS)**
- Child Development/Knowledge of Parenting

*Q12 *Q14 **(SS)** *Q16 **(SS)**
Q13 **(SS)** Q15 **(SS)**

The Child Development/Knowledge of Parenting factor is composed of five unique items that do not necessarily correlate. Because of the nature of these items, the PFS authors recommend calculation at the individual item level rather than a subscale score.

**Note: Positive impact is indicated by a lower "NOW" score for items Q12, Q14, and Q16.*

Family Functioning/Resiliency

Social Emotional Support

Concrete Support

Nurturing and Attachment

Child Development/Knowledge of Parenting

Participant Demographics
